6,136 views Mar 6, 2022 [AWS CDK - Host Static Website \(Typescript\)](#)

In this video, AWS TypeScript CDK is used to deploy an S3 bucket to hold media assets, a CloudFront distribution for a content delivery network for those assets and set up an "A" (Alias) record for that CDN through Route53.

You will learn:

- Learn How to set up AWS CloudFront Distribution For S3 Origin.
- What is CDN, and How it works
- Create Basic React Application
- How to setup S3 for CloudFront Distribution using AWS CDK
- Setup AWS CloudFront with S3 Origin using AWS CDK
- Create SSL Certificate using AWS Certificate Manager using AWS CDK
- Configure AWS Route53 for CloudFront Distribution using AWS CDK
